<i>Preface</i>	1
<i>Foreword</i>	9
<i>In brief</i>	13

## Part 1

### DNA Innovation in Business

<b>1. The Actor Base (A) and Innovation Profiles</b>	25
From <i>Huis Clos</i> to performing innovation	25
Traditional innovation styles	27
Building the plot: The author's role	30
Casting roles in the innovation play	32
Acting out the innovation play	37
<b>2. The Ideation Base (I) and Creative Expression</b>	41
From "stage master" to idea scripting	41
Staging the explosion of ideas	43
Expressing unity of time	47
Expressing unity of place	48
Expressing unity of action	50
Staging the idea	54
<b>3. The Emotion Base (E) and the Innovation Senses</b>	59
Function, chance and emotion	59
Finding an echo with the consumer's five senses	64
Transmitting and nurturing remote memory	73
<b>4. The Collaboration Base (C) and the Ability to Implement Innovation</b>	75
From a single note ... to playing the whole innovation score	75
Giving the innovation score rhythm	77
Measuring melody and musical style	83
Managing four fundamental paradoxes	85

Part 2  
**The Environment: DNA Mutation Factors**

<b>5. The Environment: Bearer of Genetic Mutations</b>	93
From the island of Hawaiki ... to genetic mutation	93
Three genetic mutation factors	95
The innovation space	97
<b>6. The First Factor: Discontinuity</b>	101
Industrial revolutions	101
Technological discontinuity and industrial revolutions	103
Revolutions and traditional styles of innovation	104
Economic discontinuity and crises	106
Sociological discontinuity and conflict	108
Regulatory and institutional discontinuity	112
<b>7. The Second Factor: Historic Playing Fields</b>	117
From Bauhaus to competitive theatre	117
The audience: The consumer	120
The playing field's stage left and stage right	122
<b>8. The Third Factor: New Lands</b>	127
From Christopher Columbus ... to new lands	127
Industrial disciplines, sources of disruption	129
The first horizon: Industrial disciplines, unprecedented cross-breeding	132
The second horizon: Artistic disciplines, raw materials	137
Third horizon: Natural sciences, new laboratories	142

Part 3

**The Hyperconnected Company in an Era of Grid-like Innovation**

<b>9. The Individual: A Trigger for Genetic Mutation</b>	149
From the Marvel universe to individual mutation	149
The individual and how to mutate	151
Individuals generate and co-create innovation	154
Individuals monetise and influence innovation	158
The individual becomes ubiquitous	160
<b>10. The New (A) Base: The Extended Company and its New Roles</b>	165
From MMOG to new DNA bases	166
(A) base: Extended actors	168
David and Goliath role-play	170
The explorer role-play	175
<b>11. The New (C) Base: From Collaboration to Cooperation</b>	179
The (C) base extended beyond company walls	179
The game publisher model	182
The cluster model	185
<b>Conclusion</b>	191
<b>Acknowledgements</b>	195
<b>Bibliography</b>	199
<b>Glossary</b>	205
<b>Index</b>	209

# Exhibits

## Remarkable experiences

1 – Vivid-i from GE Healthcare: An innovation play	29
2 – Four typical company innovator profiles	35
3 – Louis Vuitton's door is permanently open to creativity and the world	44
4 – The 360° innovation model at 3M	46
5 – Bouygues Télécom's innovation space	49
6 – IDEO's four pillars of creativity development	57
7 – An expert's vision: Empathy, design and innovation	66
8 – Front end of innovation: Definition, responsibility, benefits and future	79
9 – France Télécom's innovation bazaar	88
10 – Discontinuity and the pharmaceutical industry	113
11 – Finaref and La Redoute's new sales model	124
12 – L'Échangeur: Sharing technological and marketing innovation	134
13 – An unprecedented alliance between BNP Paribas and EDF	136
14 – Hermès: The search for young talent	139
15 – Individuals play a pivotal role in Danone's innovation model	157
16 – Remote collaboration with Cisco Telepresence	162
17 – SMEs catering to national police needs	171
18 – Image complements distribution at La Poste	172
19 – Open innovation at Air Liquide: Nitrojet™	173
20 – Exploring new models in the ICT sector	177
21 – Creating a grid-like innovation culture at Siemens	181
22 – Attracting grid-like innovation to Pierre Fabre	184
23 – Attracting grid-like innovation to PoweO	184
24 – The Silicon Valley cluster model	188
25 – The cluster model: Competitiveness poles	189
26 – A cluster example: System@tique Paris-Région	189

## Singular stories

A – DNA as a source of inspiration and a model	14
B – <i>No Exit</i> by Jean-Paul Sartre: One author, several styles, one interpretation	26
C – On innovation	27
D – The producer: Flag-bearer and guarantor of the rules of the game	42
E – From idea to ideation and creativity	43
F – Chance in culinary innovation	60
G – Theatre as a tool for transmitting knowledge	73
H – A musical alphabet	76
I – From Maoris to genetic mutation	94

J – From architecture to Bauhaus	118
K – Stage left and stage right of the innovation theatre	122
L – Christopher Columbus on the lookout for new playing fields	128
M – From the Medici family to the dawn of the Renaissance	137
N – Of termites and architecture	142
O – Of birds and “haute couture”	142
P – From Marvel to innovative company DNA mutation	150
Q – MMOG	167
R – Of explorers and “royal privateers”	175

## Figures

1 – The genetic fingerprint of innovation	17
2 – Nitrogenous bases of an innovative company’s DNA	18
3 – The three factors of genetic mutation	19
4 – The hyperconnected or grid business	21
5 – Four typical company innovator profiles	34
6 – The cadence of innovation for a company	78
7 – Three factors of genetic mutation	96
8 – Innovation typology	99
9 – The Hype curve	102
10 – The hyperconnected company	166
11 – The three layers of a grid-like innovation policy	182

## Table

1 – Key character traits of the four innovator profiles	36
---	----
